

Game Fish & Aquatics

Purina Mills Game Fish & Aquatics

The pleasures that a pond bring are numerous. Whether you fish, boat or simply enjoy a quiet walk at the water's edge, you probably already know that your pond is a living part of the natural landscape.

You, however, may not know that you can play a vital role in enhancing the vibrancy of that life. By taking the time to understand the basic dynamics of your pond's health, you can gain valuable insights that will protect this treasured resource and improve upon it.

The Purina Mills Fish/Aquatics web site will help you gain a basic understanding of current pond and fish management techniques that will help ensure that your pond will remain alive and thriving for many years to come.

For more detailed product and nutritional information please visit our website at <http://www.fishchow.com>.

	<p>Game Fish Chow®</p> <p>Complete and balanced nutrition for full range of pond fish. Excellent for catfish, bluegill, minnows and carp.</p>
	<p>Aqua Max - Carnivorous</p> <p>Trout, Hybrid Striped Bass, Yellow Perch, and Red Drum are major carnivorous species that are fed manufactured diets. These fish require high protein, nutrient dense diets that promote growth and maintain good health.</p>
	<p>Aqua Max - Omnivorous</p> <p>Catfish and Tilapia are the major species for this category of diets. These two species do not require the protein levels nor the nutrient density of carnivorous fish, but do require more moderate amounts of nutrients. Omnivorous species are usually warm water animals.</p>
